SUMMARY

Motivated Full Stack Developer with expertise in the MERN stack, seeking to leverage my skills in building scalable and efficient web applications. Eager to contribute to a forward-thinking, technology-driven company by driving innovation and success. Proficient in developing user-centric solutions and leveraging emerging technologies to solve complex problems.

EDUCATION

MCA (Master of Computer Application) | Shivaji University Kolhapur | 2023

BCA (Bachelor of Computer Application) | Vivekanand College Kolhapur | 2021

HSC | New model Junior College Kolhapur | 2018

SKILLS

Technical Skills :

- Front-end : JavaScript (ES6+), HTML5, CSS3, React.js, Redux.
- Back-end : Node.js, Express.js, PHP, RESTful APIs.
- CSS Frameworks and Libraries : Bootstrap, Material-UI, Tailwind CSS.
- Database: MongoDB, PostgreSQL, MySQL.
- DevOps: Docker, CI/CD, GitHub Actions.
- Programming Languages : Python, C, C++.
- AI Model : OpenAI GPT-3.
- Tool : Git.

Soft Skills :

- Collaboration, Resourcefulness, Critical Thinking, Strong Work Ethics, Positive Attitude, Willingness to Learn.

Languages :

- English, Hindi, Marathi.

CERTIFICATIONS

- **Full Stack Developer** | Digital Lync, Hyderabad | 2023
- **Web Development Internship** | CodeSoft (Remote) | 2023
- **Python** | Udemy | 2024

PROJECTS

Amazon Clone Web Application | June 2024

- Engineered a robust, scalable e-commerce platform mirroring Amazon.in, featuring user authentication, dynamic product catalog browsing, and seamless shopping cart management.
- Implemented a secure checkout process with advanced product filtering options, ensuring a smooth user experience from browsing to order completion.
- Designed to handle large-scale user traffic with a focus on high availability and fault tolerance.
- Technologies Used : React.js, Redux, Redux-thunk, Node.js, Express.js, bcryptjs, jsonwebtoken, MongoDB, Bootstrap, Material-UI.

AI-Powered Utility Suite | April 2024

- Integrated state-of-the-art OpenAI models, including ChatGPT for conversational AI, Whisper for text-to-voice and voice-to-text conversions, and DALL·E for image generation.
- Developed a versatile utility suite with a user-friendly interface, significantly enhancing productivity and accessibility for end-users. Enabled seamless PDF-to-text extraction, making document management more efficient.
- Technologies Used : React.js, Node.js, Express.js, OpenAI API (ChatGPT, DALL·E, Whisper).

Human Resource Management System | Nov 2023

- Developed a comprehensive web application to streamline HR processes, managing employee databases, payroll, leave requests, and interview scheduling across multiple companies.
- Focused on creating intuitive, user-friendly interfaces to enhance usability and efficiency.
- Technologies Used : React.js, Redux, Node.js, Express.js, MongoDB.
